Pace Profile Report

SPEED RATIOS EXPLAINED

Early Speed Ratio (ESR): A measurement of a horse's early energy expenditure in relation to the total race requirements. The lower the figure, the greater the horse's early exertion in that event.

- 15 = Demanding.
- 10 = Brisk.
- 5 = Moderate.
- 0 = Soft.

Tip(s): Animals that combine low ESRs with high speed figures are often prime candidates to win in wire-to-wire fashion. So too are those steeds with a significant overall ESR advantage.

Late Speed Ratio (LSR): A measurement of a horse's late energy expenditure in relation to the total race requirements. The higher the figure, the greater the horse's late exertion in that event.

- 0 = Excellent.
- 5 = Good.
- 10 = Fair.
- 15 = Poor.

Tip(s): Because late speed is measured at a time that each horse is being asked for his/her maximum effort, LSRs can be a great indication of form as well. Young horses with improving Late Speed Ratios are often superior to older, more experienced rivals with established figures. Furthermore, any animal that combines a positive Pace Profile with high relative LSRs and good speed figures must be given strong consideration. Entrants that show positive LSRs or those coming off of a big win punctuated by a superior LSR are especially strong contenders.

The Late Speed Ratios are also very effective in a negative context as well. Horses with consistently poor figures in relation to the rest of the field make notoriously poor favorites and can often lead to great overlays on other, less fancied runners.

Pace Profile: A simple comparison between a horse's Late Speed Ratio and the Early Speed Ratio of the race in which it was earned. A positive (+) profile is greatly desired and serves to authenticate especially impressive LSRs. The Pace Profile is an easy, yet crucial means of relating early speed to late speed.

Tip(s): The Pace Profile of a particular race can be especially useful when horses are switching distances/surfaces. For example, an animal that has been competing in dirt sprints might be given extra consideration in a turf route if he/she shows a string of positive (+) Pace Profiles, as distance races on the lawn tend to emphasize late speed.

Speed Figure

A number that indicates how fast a horse ran in a particular race. Figures of 100 or greater indicate a performance at or above today's par and should be heavily weighted. However, those wishing to substitute their own numbers in this category should feel free to do so.

Par

Class par of a given race. This number indicates the relative strength of the field in question and provides a great way to compare races contested at different class levels and venues. Like the speed ratings, figures of 100 or greater indicate a performance at or above today's par.

Class

A combination of average earnings per start and average purse values, used to measure overall class. A severe advantage or disadvantage in this category can often be used to upgrade/downgrade the chances of (seasoned) competitors.
